

Trajectory Forecast

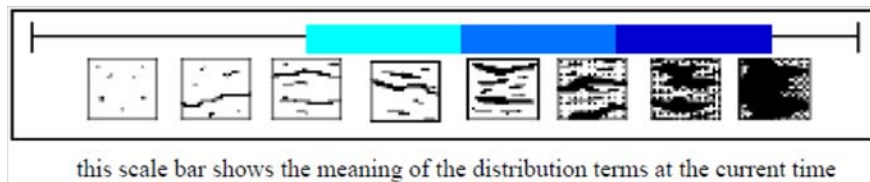

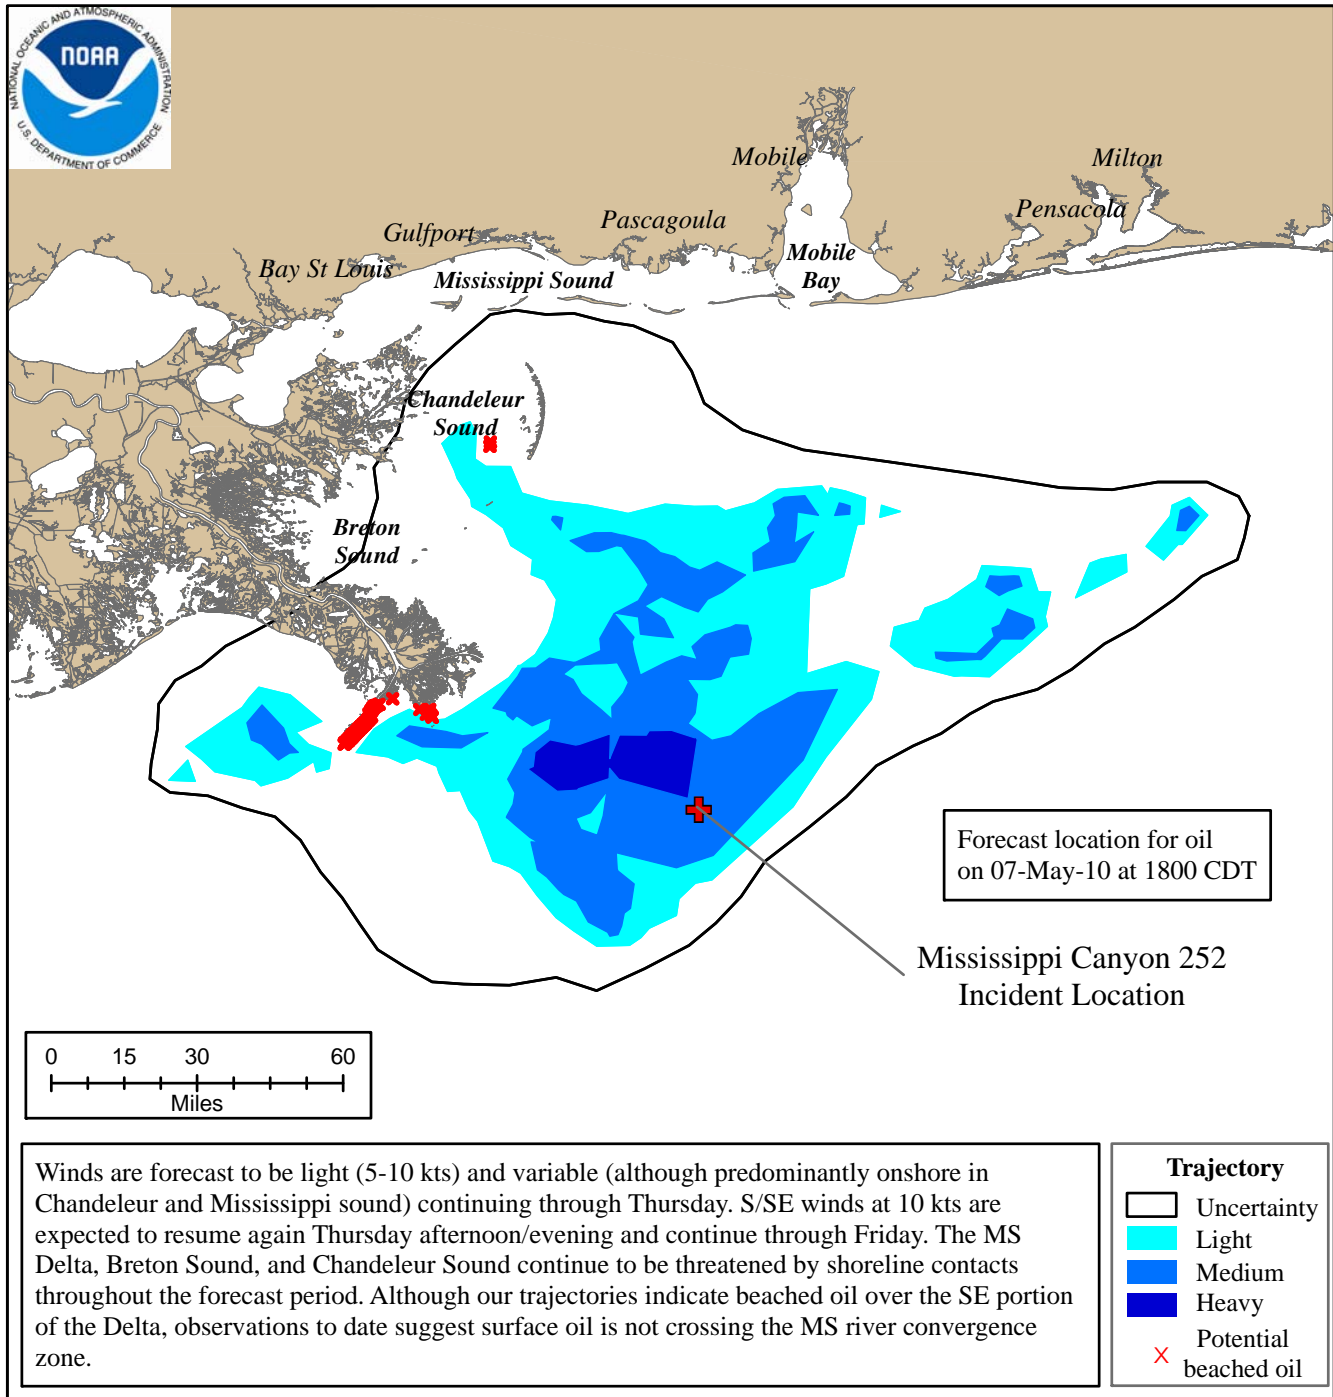

Mississippi Canyon 252

NOAA/NOS/OR&R

Estimate for: 1800 CDT, Friday, 5/07/10

Date Prepared: 2000 CDT, Wednesday, 5/05/10

This forecast is based on the NWS spot forecast from Wednesday, May 5 PM. Currents were obtained from the NOAA Gulf of Mexico, Texas A&M/TGLO, and NAVO/NRL models and HFR measurements. The model was initialized from early morning satellite imagery analysis provided by NOAA/NESDIS and Wednesday overflight observations. The leading edge may contain tarballs that are not readily observable from the imagery (hence not included in the model initialization).
