

Trajectory Forecast

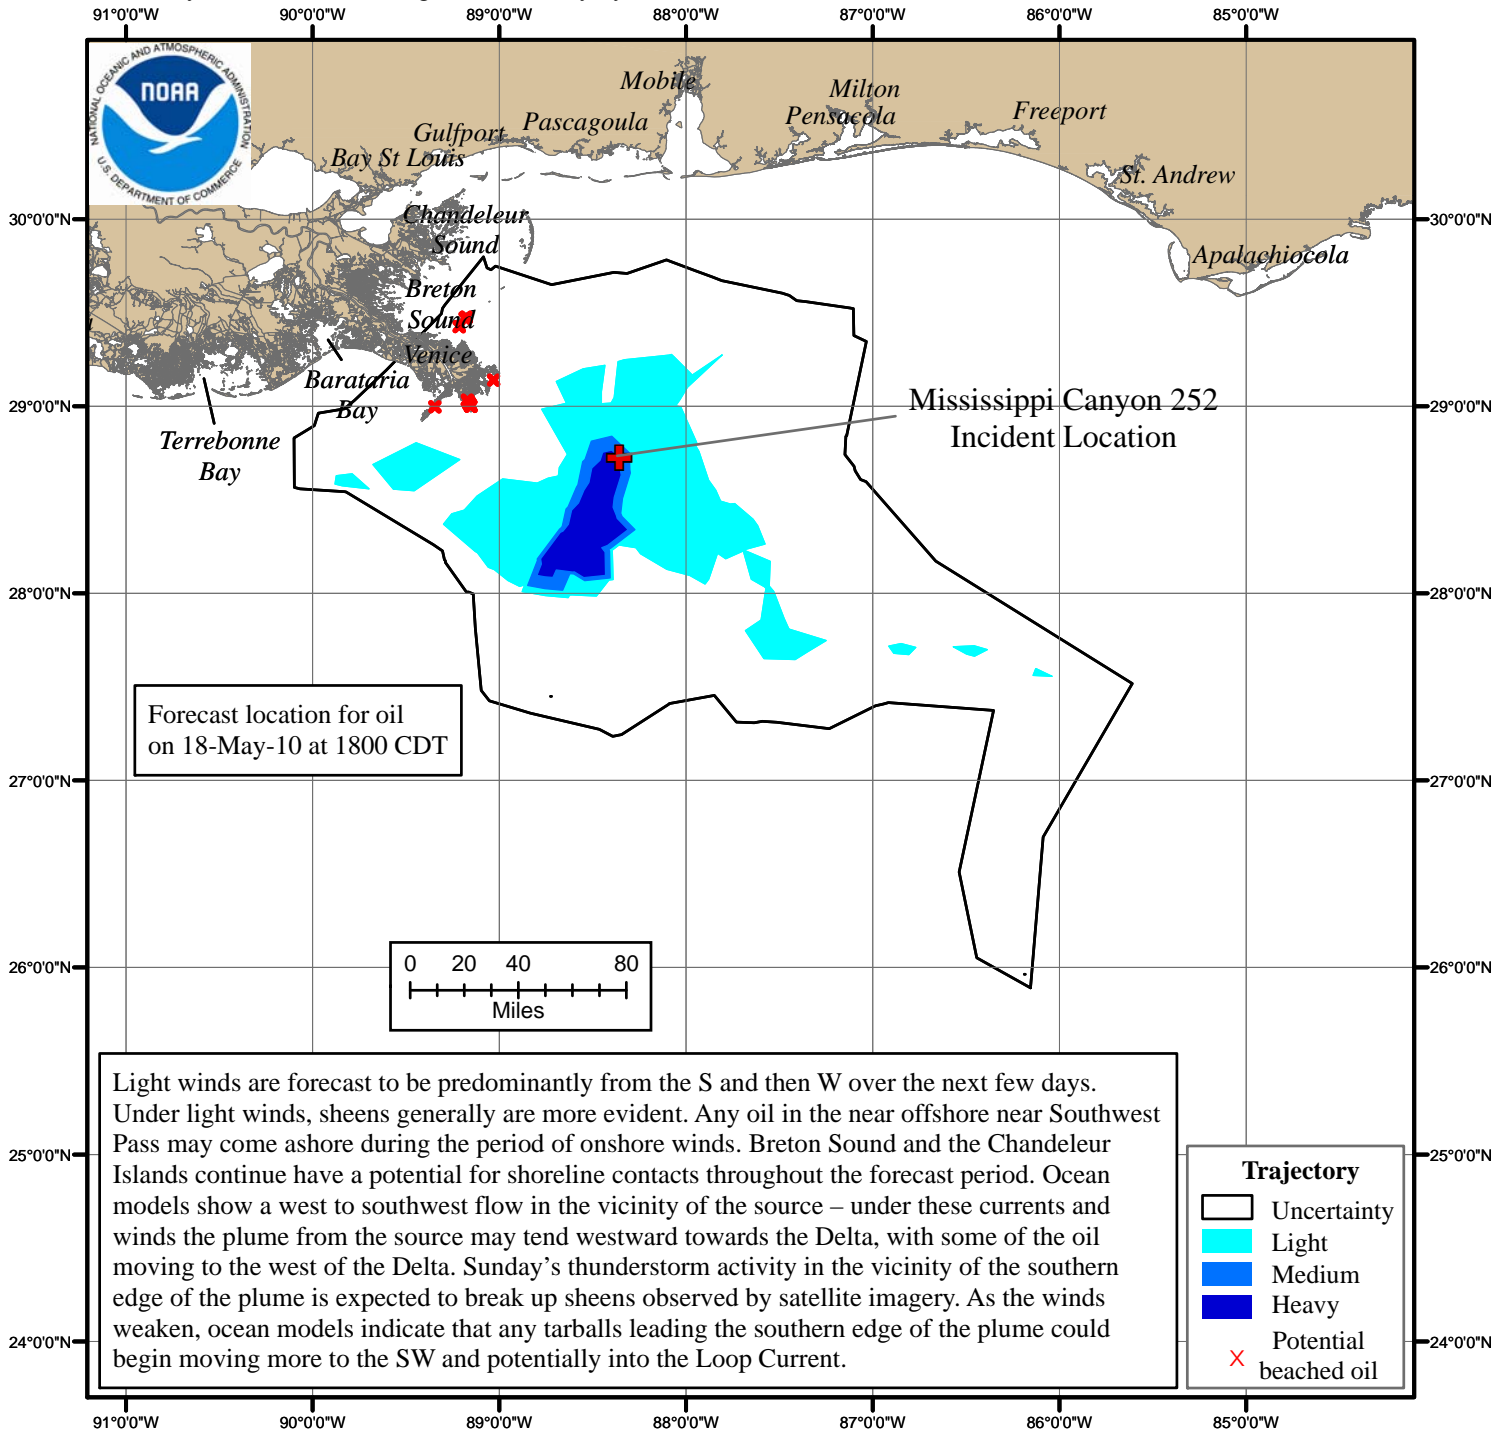

Mississippi Canyon 252

NOAA/NOS/OR&R

Estimate for: 1800 CDT, Tuesday, 5/18/10

Date Prepared: 2100 CDT, Sunday, 5/16/10

This forecast is based on the NWS spot forecast from Sunday, May 16 PM. Currents were obtained from several models (NOAA Gulf of Mexico, West Florida Shelf/USF, Texas A&M/TGLO, NAVO/NRL) and HFR measurements. The model was initialized from Saturday morning satellite imagery analysis (NOAA/NESDIS). The leading edge may contain tarballs that are not readily observable from the imagery (hence not included in the model initialization). Oil near bay inlets could be brought into that bay by local tidal currents.
