

# Offshore Surface Oil Forecast Mississippi Canyon 252

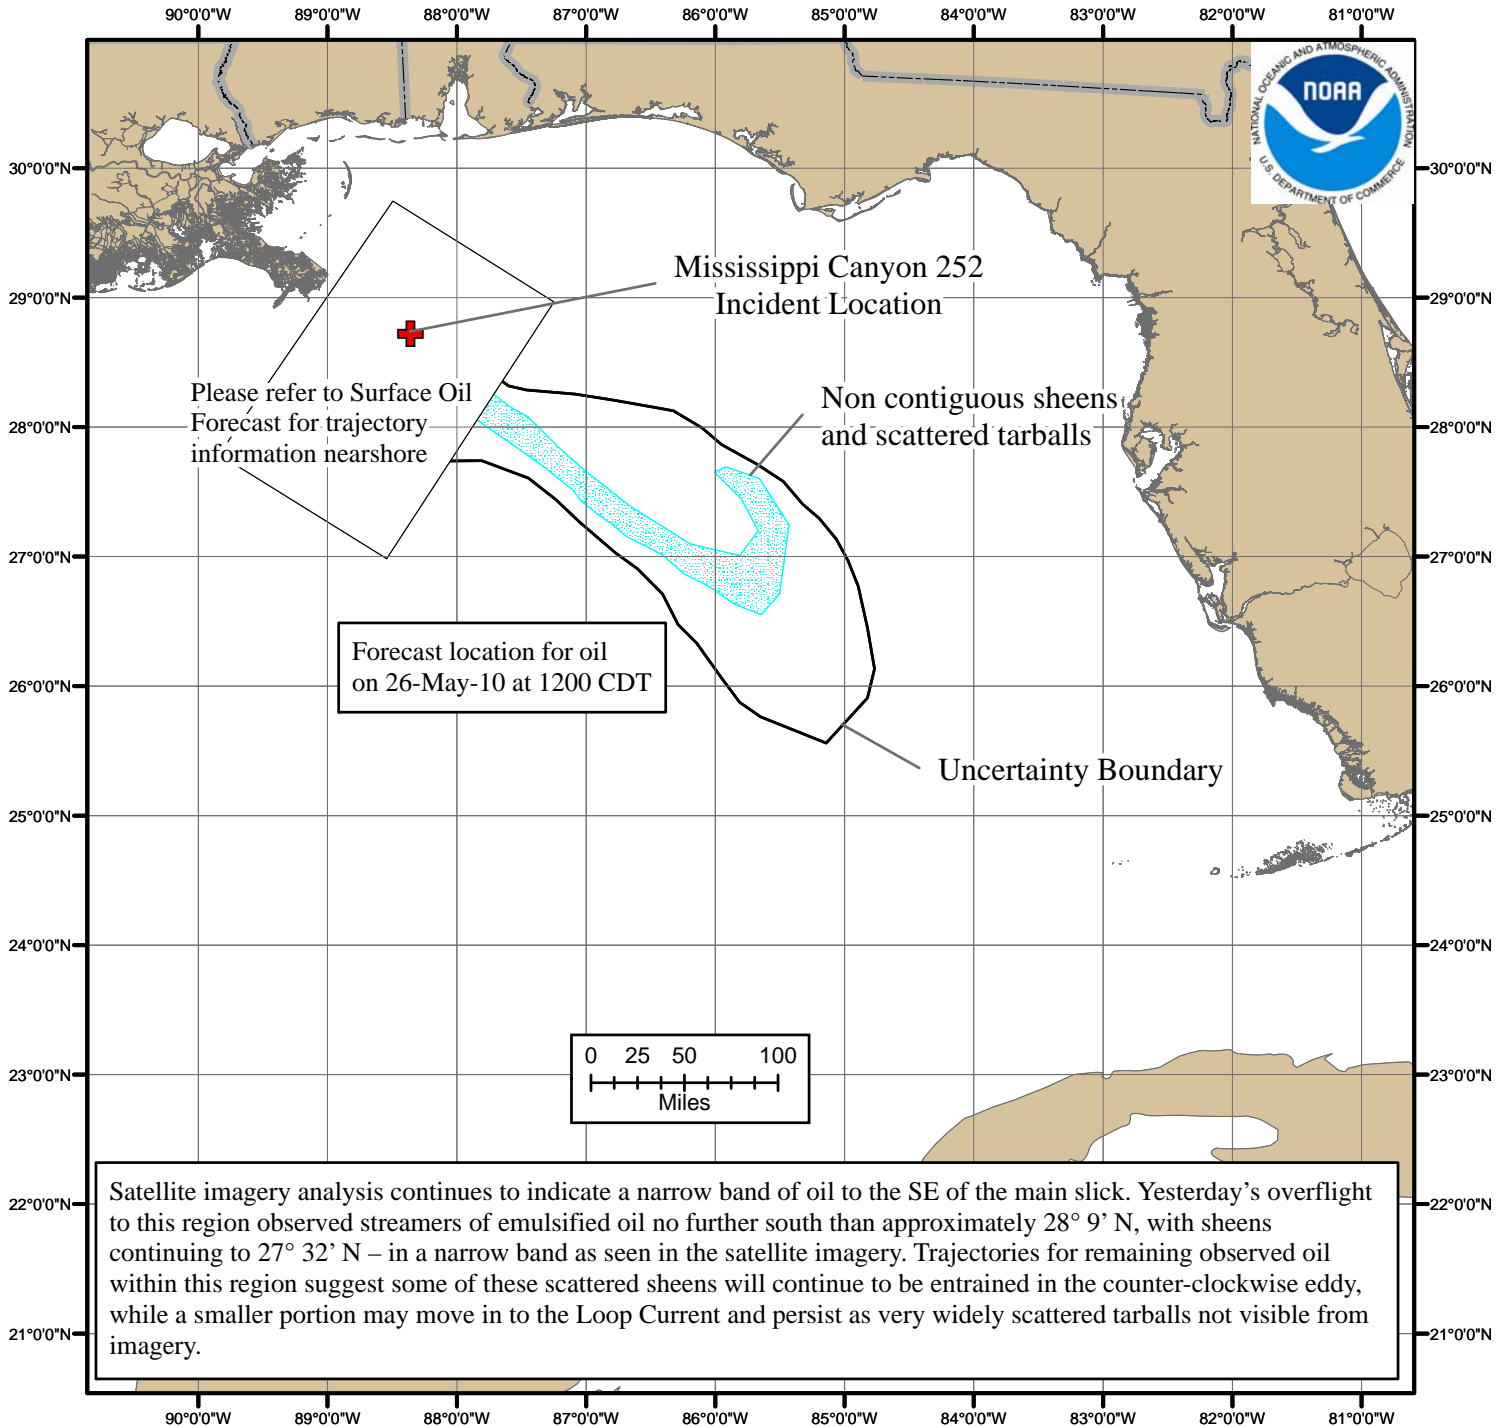

NOAA/NOS/OR&R

**Offshore**

Estimate for: 1200 CDT, Wednesday, 5/26/10

Date Prepared: 1600 CDT, Monday, 5/24/10

Currents were obtained from four models: NOAA Gulf of Mexico, West Florida Shelf/USF, NRL IASNFS and NC State SABGOM. Each includes Loop Current dynamics. Gulf wide winds were obtained from the gridded NCEP product. The model was initialized from Monday morning satellite imagery analysis (NOAA/NESDIS). The leading edge may contain tarballs that are not readily observable from the imagery (hence not included in the model initialization).
